> Who We Are

MKS Marksell is a **100% Brazilian** company, pioneer and leader in the sector of the Market relating to equipment for the moving of cargo and people.

Installed in Itapevi, in the region of the Greater São Paulo, **MKS Marksell** relies on a flexible production structure in a total area of 6000 square meters.

MKS Marksell develops, designs and manufactures, using its own technology, equipment for the **movement of cargo and people** which can be fitted on to vehicles or remain stationary, with a great **emphasis on hydroelectric activation**.

Apart from developing equipment with state-of-the-art technology, **MKS Marksell** has as its objective finding **solutions to your loading and unloading needs**.

Through the intermediary of our consultants we listen to your requirements, and by applying all our experience we will find **practical solutions** to enable you to solve your problems **with the highest degree of satisfaction**.

We are the only Brazilian company that offers a wide range of options of equipment to enable you to identify **the best solution to your type of need**.

In order to allow all this to happen we depend on a Projects and Engineering team with wide experience and competence, and with the latest state –of-the-art equipment available.

We exhaustively put to the test all our equipment, so that our customers will enjoy the best cost/benefit ratio and have the certainty of efficient and safe operations.

Performance of MKS Marksell around the World

MKS Marksell is based in São Paulo – Brazil, but the company is present in many countries around the world, especially in Latin America, Europe and Africa.

> MKS Marksell Exclusiveness

MKS Marksell develops equipment, devices and exclusive systems in order to allow you to obtain the best performance, as well as thinking about your safety. Check these following instances:

• Patented MKS 200PEG equipment, developed together with Ultragas, with the objective of carrying out the loading and unloading of GLP and atmospheric gases.
• Patented anti-shock devices for frontal levellers that have the purpose of protecting your equipment and making it long-lasting.
• BTS System, Built to Suit Dock Levellers, developed with the objective of reducing in up to 50% your initial investment in dock levellers.
• The new MKS Marksell Button Control has extra low voltage, an alert visor diagnosing any problems with the equipment, and conforms to all the demands of regulation *NR10* and *CE* from now on. All models of MKS Marksell Hydraulic Dock Levellers will have as a differential button controls which are in accordance with the standards laid down by nr10 (*Regulatory Norm 10 – Safety in Electrical Installations and Services*) and ce. you will benefit from a smart service with a touch membrane, a smart service warning any failures, and a preventive maintenance timer.
• The ADPLAT product, designed for vehicular platforms – It is our understanding that because MKS Marksell customers are always focused on the logistics of their operations, they lack a space dedicated to communicating with the market in general. As a result, MKS Marksell, together with New View Media, has created a strategic area on the MKS Marsell platforms, to enable you to communicate with the public, within a standard space, and which can be easily substituted.

> Our Products

Tail Lifts

For various uses (palletized cargoes, hand trucks, rolltainers and pushcarts) with a cargo capacity of between 400 and 2500kg. Installation can be made on pick-ups and small vans to heavy vehicles.

Tail Lift for Gas Bottle Distribution

For loading and unloading drums and gas bottles, it has a cargo capacity of between 200 and 500kg. Installation can be on the side or the rear of the vehicle.

Dock Levellers

It acts as a bridge between the dock and the truck. It is available in various models and weight capacities, activation can be manual/mechanic or hydraulic; it can be vertical or fixed on pit.

Sectional Doors - *My Door, Welcome.*

The sectional doors and protection covers for docks My Door offer you safety and resistance as well as a modern design. We offer various models to adapt to the needs of the building, shed or warehouse.

Shelters Protection Covers for Docks

Our doors and protection covers for docks are in accordance with work safety rules and protection covers for docks resistant to wear and tear.

Passenger Lifts

It is for lifting wheelchairs on to vans, micro-buses and buses.

Vehicular Cranes

For raising bags and cargoes in general, with a cargo capacity of 1,0 to 2,0t.m.

DMC 2500 - Lifting Platform Mobile

Developed to allow the loading and unloading from all cargo vehicles on a chassis (from small vehicles to containers).
